

AZKAR RENOVATES ITS HANDLING SYSTEMS

Last February, AZKAR and ULMA signed an overall contract for all handling systems in Azkar

15th March of 2010.- AZKAR, in agreement with its constant bet for technological renovation, reached an agreement with ULMA HANDLING SYSTEMS for the integral service and maintenance of its whole park of lift trucks for the next five years.

Both companies had come to agreements with flexible and innovative solutions due to the importance of the park, the specific needs of a company of AZKAR's dimensions, the complexity of the operation and the seasonal variation of the work.

This way, AZKAR will use 600 units of handling systems from MITSUBISHI, that ULMA HANDLING SYSTEMS is importing in an exclusive way in Spain.

Across this contract, Azkar gives continuity to its constant effort for offering to the client the best service and the most personalized offer.

In a generic way, Azkar offers to the customers' disposal a powerful international network for the merchandise import and export management, either for any origin or destination all over the world and in the Iberian Peninsula, where the Company has at its disposal 71 facilities in Spain and Portugal, with more than 500,000 square meters built on more than 1Million square meters plot, a 5,000 professional staff and a 2,200 vehicles fleet.
