

AZKAR COLLABORATES WITH IMAGINARIUM IN THE II ANNUAL CAMPAIGN OF SOLIDARY CHILDREN

Azkar began the tasks of collection and distribution of the gifts in November.

Madrid, 15th december of 2009.- Azkar offers, once again, its infrastructures for a good reason. Together with *Imaginarium*, the *Fundación Antena3-Ondacero* and *Mensajeros de la Paz*, Azkar will make the neediest children to be happier in Christmas time by the solidary campaign "A Gift full of Christmas". This campaign is based on the collection and distribution of Christmas gifts inside boxes of shoes.

Children have prepared for other children a gift of Christmas inside a box of shoes, decorated by themselves. Inside, there will be one or more articles and a message of affection for a child of the same age.

Once the package is prepared, it will be necessary to drop it in the nearest point of collection and Azkar starts the tasks of collection and distribution of the gifts to all the children before the end of December. It is important to be able to transmit formative and human values to all the children, because we do not want to promote a simple campaign of withdrawal of toys. The idea goes beyond, we want children to have the chance to think about who will receive their present so that they can learn to put themselves in someone else's shoes.

The campaign "A Gift full of Christmas" (that was the name of the first campaign) gave happiness to more than 65.000 children in the last year. 30.000 boxes of shoes were distributed in Spain to more than 50 solidary infantile projects of different countries including Spain, Algeria, Kosovo, Afghanistan or Mauritania.

AZKAR offers its customers a powerful international network for the management of imports and exports of goods, from any origin or destination in the world outside Europe, through Azkar Overseas, as in Europe traffic through Azkar Overland, or at the Iberian Peninsula and islands. The company has 73 facilities in Spain and Portugal, more than 500,000 m2 built on more than 1 million m2 of land, 5,000 employees and a fleet of 2,400 trucks.
