Sorting 3,000 pieces per hour

Azkar, leader in the Iberian Peninsula and Islands, has in Vigo one of the most important facilities in the northern peninsula. Located in the Technological and Logistics Park in Valladares, on 29,500 square meters of plot surface, the company built in 2005 a total of 14,300 square meters as warehousing surface, reserving space for a future expansion. From here, the company provides distribution services in road freight, logistics outsourcing and overseas air and sea traffic, across the whole supply chain of their customers, both for domestic and for international business
