The crisis invoices to the goods transportation.

The crisis is invoicing to the sectors linked to the logistics, especially to the road transportation. For the last two years, this sector has suffered in the whole world the economic crisis in first person provided that the commercial exchanges in most of the markets, diminished since the end of 2007. Nevertheless, according to the recorded data, this 2010 seems to show a shy recovery of the sector. The last numbers that AENA has facilitated and State Ports show the beginning of a positive fiscal year.
