Out of stock costs stand for 4,000 million euros annually.

Out of stock stand for more than 4,000 million euros annually. According to AECOC, 11% of deliveries have to be returned, more than 6% of orders have any incidence and 22% do not reach their destination on time. This is a recent analysis by Aecoc (Manufacturers and Distributors Association), collected in a study that also shows information regarding the country's major distributors, studies the different parts of the supply chain (orders, replenishments, documentation, billing, etc.) and finally, evaluates the savings and opportunities of the industry. In fact, 68% of the companies consider as a priority to optimize the logistics management, according to the Supply Chain Congress organized by Aecoc.
