Tons transported by road fell in Spain 14,8 % in 2009.

Tons transported by road in heavy vehicles of general service got down last year 14,8 %, as it comes from the information contained in the Observatory of Activity presented last week in the Ministry of Public Works, which it places the sector in similar figures to those of 2004. In this document a decrease of the activity is reflected also in a 1,7 % during the fourth quarter of last year, an information even worse in case of the interregional transport, -3,2 %.
