Spanish ports moved nearly three million containers in first quarter, 3.8% up.

Container traffic from the 46 ports in Spain reached 2.97 million TEUs during the first quarter, which meant an increase of 3.8% over the same period in 2010, according to Provisional data provided by the Port authorities at the Ministry of Development. This result consolidates the sustained growth that this type of traffic had last year, when the ports moved 12.5 million TEUs Spanish.
