### **The EU wants to push for the Unique European Sky.**

The Spanish Minister of Public Works, Jose Blanco, announced last Friday, the 23rd of April the summons of an extraordinary meeting of the European Union Transportation Cabinet in May to stimulate the implantation of the Unique European Sky. In the same way, the Minister has requested to the European Commission that in the above mentioned meeting, it should be approached the integration of the European Organization for the Security of the Air Navigation (Eurocontrol) as manager of the European network as well as the review of the response procedures after emergency situations.
