Date: 11th March of 2010

The occupation of logistic spaces falls 27 % regarding the previous year.

All the sectors (industrial areas, small facilities and soil) have been hit by the progressive deterioration of the economy and the decrease of the consumption during 2009, and the volume of investment was scarcely 85 million Euros, which represents only 15 % of the investment registered in 2007, before the financial international crisis, as it was reported yesterday, on March 10, in press conference, by Gustavo Rodríguez, the director of the manufacturer's division and logistics and by Guillermo García-Almuzara, in charge of Jones Lang's logistics LaSalle.
